PRODUCT LAUNCH APPROVAL RECORD

Project: Discovery Feed v2
Project ID: LAUNCH-026
Business: ConnectSphere
Jurisdictions: United Kingdom and European Union
Target launch: 15 December 2026
Current status: NOT APPROVED FOR LAUNCH

---

1. Required departmental approvals

Department	Required review	Approval status	Evidence / Comments
Legal	Regulatory applicability, advertising disclosures, consumer protection and user-facing terms.	Pending	Written legal assessment required.
Product	Feature requirements, user controls, promotional presentation and launch scope.	Pending	Product requirements document required.
Engineering	Technical implementation, user settings and advertising disclosure functionality.	Pending	Test results and implementation evidence required.
Trust & Safety	Illegal-content and child-safety risk implications.	Pending	Risk assessment and mitigation review required.
Compliance	Documentation completeness and evidence retention.	Pending	Completed compliance checklist required.
Regulations	Coordination, regulatory mapping and verification of approval records.	Pending	Final regulatory review record required.

2. Approval conditions

The following conditions must be satisfied before launch approval:

1. Legal confirms the applicable regulatory requirements.
2. Product confirms that the proposed feature meets documented requirements.
3. Engineering demonstrates that the required technical controls function correctly.
4. Trust & Safety confirms that relevant safety assessments and mitigation measures are completed.
5. Compliance verifies that the evidence is recorded and accessible.
6. Outstanding regulatory issues are resolved or formally escalated.

3. Approval authority

Departmental approvals must be provided by authorised representatives of the respective departments. Regulations Dept. coordinates the approval process but does not replace Legal's interpretation or the technical and operational sign-offs of the responsible teams.

4. Final decision

Decision: HOLD – LAUNCH NOT APPROVED

The feature may proceed through development and testing, but production release remains subject to completion of the outstanding regulatory reviews and documented departmental approvals.

Record owner: Regulations Dept.
Record status: Open – awaiting approvals.
