**INTERNAL PROJECT STATUS UPDATE**

**To:** Legal, Product, Engineering, Trust & Safety and Compliance
**From:** Regulations Dept.
**Date:** 2 November 2026
**Subject:** Discovery Feed v2 – Regulatory Launch Review
**Project ID:** LAUNCH-026

---

**1. Overall status**

**AMBER – Launch approval outstanding**

The proposed Discovery Feed v2 introduces personalised content recommendations, sponsored posts and premium subscription promotional cards.

An initial regulatory review has identified requirements under the EU Digital Services Act, UK Online Safety Act and UK consumer protection legislation.

The project remains in development. It is not approved for production release.

**2. What has changed?**

The proposed release introduces:

- New recommendation and ranking functionality.
- Sponsored content integrated into the discovery feed.
- Promotional subscription cards.
- Changes to the distribution of user-generated content.

These changes require consideration of recommender transparency, advertising disclosures, consumer-facing information and online safety risks.

**3. What is required?**

The following activities remain outstanding:

| Activity | Responsible team | Required outcome |
|---|---|---|
| Confirm regulatory applicability | Legal | Written regulatory assessment |
| Review recommender disclosures | Legal / Product | Approved user-facing information |
| Verify advertising identification | Product / Engineering | Testing evidence |
| Assess safety implications | Trust & Safety | Updated risk assessment where required |
| Review consumer-facing promotions | Legal / Product | Consumer protection assessment |
| Verify implementation evidence | Compliance | Complete evidence register |
| Coordinate final approval | T&S Regulations | Recorded departmental sign-offs |

**4. What has been delivered?**

- Initial feature description and scope.
- Preliminary regulatory obligations mapping.
- Draft launch review checklist.
- Identification of required departmental stakeholders.
- Draft approval record.
- Initial list of outstanding regulatory activities.

**5. Next steps**

Regulations Dept. will arrange an implementation meeting with Legal, Product, Engineering and Trust & Safety.

Each department will receive assigned actions and proposed completion dates. Progress will be tracked through the project action register.

Outstanding regulatory questions and unresolved control gaps will be escalated before the launch decision.

**6. Launch recommendation**

Maintain the launch hold until the required assessments, technical testing, consumer protection reviews and departmental approvals have been documented.

**Prepared by:** Regulations Dept.
**Status:** Open – regulatory implementation in progress.
